

# 2022 OX Sauvignon Blanc

## **2022 VINTAGE**

The 2022 growing season in Washington State was made up of a cool wet spring, a brief hot summer and unprecedented warm fall weather that extended all the way to Halloween! The final crops were heavier, particularly white varieties, due to large berries and clusters. We and our growers were able to thin appropriately which resulted in lower brix, exceptional flavors and high natural acidity. The 2022 vintage is expected to be a very high quality vintage for white wines and an exceptional vintage for high end reds!
